~♡~ Candle Magic ~♡~

This is an illustration of how to use location on a plate both to enhance and interpret candle spells.

You can place your petition in the area you are trying to effect. (Past, present, future, target's environment, your environment, material change, spiritual change)

When the candle burns down read the results based on these coordinates to know what's going on, where changes are occuring, where bockages are, etc.

Good signs:

- A complete burn all the way down with no flow and no raised ring of wax.

- clockwise flow. (Check how far to the edge of the plate it reaches to know how long until success and how long success will last)

- positive shape in wax: hearts (love), stars (success or fame), circles (power), rings (only positive if the spell is done for protection or marriage), birds (messages)

- flows that intertwine when two candles are used. Indicates coming together of two things. (Usually negative in a break up or separation spell however)

Negative signs:

- tumor like shapes on the candles that do not melt when the candle does (illness, injury, or sickness of some other kinds that must be resolved before the spell can succeed)

-rings (when no for marriage or protection) symbolize protection or bltotal blockage.

- counter clockwise flow: indicates something moving away. (Positive in break up or send away magic)
